

# RECOMMENDATIONS FOR WASTE SORTING

## 1 ADVICES HOW TO REDUCE PACKAGING

We buy recyclable packages

We take a multiuse shopping bag or bags for powdery products when going to shop

We use a multiuse flask or a reusable thermos cup for coffee or tea

We buy environment-friendly goods (items from recyclable materials)

## 2 WHY IT IS NECESSARY TO SORT?

Protection of clean environment

Preservation of natural resources and energy that are getting scarce

Protection of animals against dangers

Limited forest cutting, water and air pollution

Reduced quantity of landfills

The sorted package waste becomes a raw material and is recyclable, and if it does not suit for recycling, it is used to generate energy. Sorting helps to prevent landfill growing and to reduce environmental pollution.

# 3

## HOW TO SORT PAPER WASTE CORRECTLY?

### ✓ To dispose

- Paper and cardboard packages of food products
- Cartons and packing paper
- Newspapers, magazines, books, leaflets and brochures
- White and coloured paper waste

### ✗ Not to dispose

- Musty, wet paper, books, cardboard
- Paper and cardboard contaminated with fat and/or left food
- Disposable paper tissues and towels
- Wallpapers

### + It is recommended

- It is possible to dispose of chalky, slippery, glossy paper
- (advertising production) It is not necessary to remove metal clipping details
- It is recommended to separate thick book covers
- Paper has to be dry and clean, paper and carton boxes should be unfolded

# 4

## HOW TO SORT PLASTIC WASTE CORRECTLY?

### ✓ To dispose

- Plastic packages of food products
- Plastic packages of beverages and other liquids
- Plastic bags
- Plastic films and packages
- Plastic packages of household chemicals, cosmetic and hygienic products
- Metal packages and other metal packaging elements

### ✗ Not to dispose

- Plastic toys
- Electronic devices
- Hygienic means
- Plastic household appliances
- Packages with left food

### ⊕ It is recommended

- To rinse food packages
- If possible, to separate different materials in the package (to remove the foil lid, to remove a plastic box from a paper package)
- Not to put packages into other, better to unfold them and to compress different packages

# 5

## HOW TO SORT GLASS WASTE CORRECTLY?

### ✓ To dispose

- Glass containers for beverages
- Glass packages for food

### ✗ Not to dispose

- Mirrors and their parts
- Window glass
- Ceramic, china, tempered glass vessels
- Lamps and thermometers
- Jars and bottles with left food or liquid (they have to be emptied)

### + It is recommended

- If it is difficult to distinguish whether the product is made just from glass, it is better to dispose it into a contained of mixed waste
- Paper labels do not need to be removed
- Metal lids of jars have to be removed – they should be disposed to a container of plastic/metal packages
- It is recommended to rinse the sorted containers with water

**EVEN THE TINIEST CHANGES IN OUR  
BEHAVIOUR MAY SLOW  
ENVIRONMENTAL POLLUTION AND  
CLIMATE CHANGE DOWN. WILL YOU  
JOIN THE CHANGES?**
